> guide crypto --buy-safely

How to buy your first crypto safely._

a 5-step checklist

works in any country

[fact]

step 1: pick a regulated exchange.

check your country's regulator list before you sign up.

download the app from the official site, not an ad link

[fact]

step 2: lock the door first.

01 strong unique password

02 2FA with an authenticator app (not SMS)

03 support never DMs you first

[fact]

step 3: start with a test amount.

buy small → withdraw small
→ check it arrived

only then move more.

mistakes on-chain are final

[fact]

step 4: know your local rules.

example, nigeria:
binance stopped naira deposits,
withdrawals and p2p in 2024.

use sec-licensed platforms.

p2p: wait for the money in your bank, not a screenshot

[thesis]

step 5: own your keys, guard the phrase.

12-24 word recovery phrase
= full access to your money

write it on paper. never type it into a site or a chat.

anyone asking for it is a thief

> whoami
