Roland, why does ChatGPT keep forgetting my business? 😩

Because every new chat starts from zero.

The fix is free: a **Project.** One home for your business, with its own rules and files.

Step 1: create the project 📁

In the ChatGPT sidebar → **New project**.

Name it after your business.
Projects work on every plan, Free included.

Step 2: write the instructions ✍️

Project menu (···) → **Instructions**.

"We sell handmade bags in Lagos. Prices in naira. Friendly tone. Never promise delivery in under 3 days."

Step 3: add your files 📎

Price list, FAQ, product details, past emails.

Free plan: **5 files** per project. Plus: 25.

Step 4: chat inside the project 💬

Every new chat there **already knows** your rules and your files.

No more pasting the same intro every day.

Any catch?

Instructions only apply **inside** that project.

And don't upload anything private you wouldn't email. **Your files sit with OpenAI.**
