

CRYPTO · SAFETY

One click on "approve" can empty your wallet. Check yours.

Roland, how can someone drain my wallet without my seed phrase? 😨

With your **permission.** Literally.

When a crypto app asks you to **"approve"**, you let its contract move your tokens.

How the scam works 🎣

A fake airdrop or mint site asks you to connect and sign.

The signature is an approval, often **unlimited.** Then they move your tokens whenever they like.

The numbers 📊

Scam Sniffer counted **$83.85 million** stolen by wallet-drainer phishing in 2025, from **106,106** victims.

The biggest single theft: **$6.5 million**, from one Permit signature.

The 2-minute check 🔍

Go to **revoke.cash** or Etherscan's **Token Approval Checker.**

Paste your wallet address. You'll see **every app that can still spend your tokens.**

Revoke what you don't use ✂️

Old DEXs, forgotten mints, anything "unlimited" you don't recognise.

Each revoke is a transaction, so it **costs a little gas.**

How do I avoid it next time?

Never sign from a link in a DM or reply. Read the wallet pop-up: **approve** or **permit** = **spend permission.**

Keep a separate small wallet for trying new apps.
