> learn ai --lesson 2/100

How AI chat assistants work, simply._

ai from zero

lesson 2 of 100

[fact]

step 1: it read a huge library.

books, websites, code, articles

↓

training

↓

a model that knows patterns

in language

[fact]

step 2: your words become tokens.

"how do I save money?"

[how] [do] [I] [save] [money] [?]

a token is a word or a piece of one

[fact]

step 3: it predicts, one token at a time.

```
start  →  "Start"
       →  "Start by"
       →  "Start by tracking"
       →  ...until the answer ends

# it writes the reply word by word, picking
# the most likely next piece each time.
```

[interpretation]

so it sounds sure, even when wrong.

01 it predicts likely words, not checked facts

02 it can invent sources (called hallucination)

03 you do the fact-check

> homework --2min

your 2-minute task

ask an AI a question you
already know the answer to.

then ask: "how sure are you,
and where is this from?"

notice what it admits.
