> learn build --lesson 1/100

Why most products never launch._

builders from zero

lesson 1 of 100

[thesis]

the idea is rarely the problem.

illustrative: where most projects stall.

[thesis]

trap 1: building in secret.

```
months of work
  └── nobody has seen it
        └── nobody needs it
```

show people early. a sketch is enough.

[thesis]

trap 2: waiting for perfect.

"one more feature"

"one more week"

"after the redesign"

launch day never comes.

[thesis]

trap 3: no deadline.

no date → no pressure

no pressure → no finish

fix: pick a date and
tell someone

> homework --2min

your 2-minute task

write one sentence:

"I will launch _____
by _____."

our launch day: 4 Feb 2027.
